

Workshop on the Census-Based, Impact-Oriented (CBIO) Approach to Collaborating with Communities to Help Them Improve Their Health

18-20 September 2023

ON-SITE AND ONLINE

CBIO is a methodology that emerged from the field work of the Andean Rural Health Project in Bolivia sponsored by Duke University from 1981 to 1984. This workshop will provide a hands-on approach to the principles and practice of CBIO, led by experts with extensive experience using this methodology. The workshop will be conducted in English, Spanish, and French and will be both in-person and virtual. Participants will learn how to strengthen programs for improving the health of populations, and no technical skills or professional training are required. CBIO is relevant for any context, be it in a low-, middle- or high-income country.

REGISTRATION FEE

\$150 or
FREE for those from
developing countries

LOCATION

Campus of Duke University
Durham, North Carolina, USA
